SUMMARY

Automation and Manual QA professional with 3+ years of experience in Motor Insurance and Public Sector Sports Lottery domain including 1.6 years of onsite client experience in Japan for the Japan Sports Promotion Centre project. Skilled in functional, UI, end-to-end, cross-browser, and API testing using Postman. Experienced in test automation using Playwright with JavaScript/TypeScript and the Cucumber BDD framework. Proficient in defect tracking (JIRA), CI/CD pipeline integration (Jenkins, GitLab), and ensuring software quality in regulated and user-centric applications. Seeking a QA role to contribute to high-quality, scalable testing solutions in dynamic environments.

EDUCATION

Bachelor of Engineering in Electronics and Communication
KLE Engineering College – Graduated: September 2021

PROJECTS

Company Projects – Fujitsu Private Limited

Japan Sports Promotion Centre – Fujitsu Japan

- Served as a Manual and Automation QA Engineer for a sports lottery web platform, ensuring a seamless and compliant user experience across browsers.
- Performed functional, UI, cross-browser, and regression testing to validate game flows, ticket purchasing, and user account operations.
- Automated end-to-end test scenarios using Playwright, improving test execution speed and coverage across modern browsers.
- Documented comprehensive test cases, test plans, and edge-case scenarios to support structured QA processes.
- Tracked bugs and managed sprints using JIRA, ensuring transparency and timely defect resolution.
- Integrated Playwright tests into Jenkins CI/CD to speed up regression and boost deployment reliability.

Future Mobility Central Function – Fujitsu India

- Contributed to a motor insurance web portal project enabling users to purchase or renew vehicle insurance policies online.
- Enhanced automation test scripts for the policy issuance flow to ensure stability after code changes.
- Collaborated with the QA team to ensure smooth regression testing and improve test coverage.

WORK EXPERIENCE

Automation/Manual QA
Fujitsu Consulting Private Limited
Sep 2021 – Present

Key Responsibilities:

- Performed manual testing including cross-browser, UI, functional, and regression testing to ensure consistent behaviour across devices and browsers.
- Designed and executed API test cases using Postman, validating response codes, payload structure, and data consistency.
- Developed and maintained Playwright automation scripts using JavaScript with Mocha and integrated the Cucumber framework for behaviour-driven testing.
- Participated in building and maintaining the CI/CD pipeline, integrating automated tests to streamline deployments.
- Reported and tracked bugs using JIRA, collaborated with developers during sprints, and participated in defect triage and status calls.

ADDITIONAL INFORMATION

Technical Skills:

- **Manual Testing:** Functional Testing, UI Testing, Regression Testing, Cross-Browser Testing
- **Automation Testing:** Playwright, BDD Framework Cucumber
- **API Testing:** Postman
- **Defect Management:** Jira
- **Programming Languages:** HTML, CSS, JavaScript, TypeScript
- **CI/CD & Version Control:** Jenkins, GitLab CI/CD Integration
- **Development Tools & IDEs:** Eclipse, IntelliJ IDEA, Visual Studio.
- **Frameworks & Libraries:** Playwright

Domains:

Public Sector, Motor Insurance

Certifications:

- Playwright Automation Testing
- Manual Testing
- Japanese NAT Q5 Certified

Languages:

English (Fluent), Kannada (Fluent), Hindi (Fluent), Japanese (Basic), Marathi (Fluent)

Other Skills:

Client walkthroughs, system functionality explanations, strong reporting in Agile environments

Strengths:

Hard-working, responsible, with strong leadership and teamwork skills.
